ECODERMAL SKIN SPRAY

Contego Ecodermal Skin Spray is a new high-purity hypochlorous acid-based topical spray for animals. It has fast-acting antibacterial, antiseptic, antifungal and antiviral properties making it suitable for use on a wide variety of skin presentations.

Contego Ecodermal Skin Spray is non-toxic and gentle in action. It soothes and calms the skin, aids skin recovery and reduces itch. Contego Ecodermal Skin Spray is suitable for managing wounds and helps encourage wound healing. It can be used pre, peri and post operatively for enhanced wound care management. Suitable for animals with sensitive skin.

Contego Ecodermal Skin Spray can be used on all companion animals including dogs, cats, rabbits, guinea pigs, hamsters and other small animals and birds.

Before & after 5 applications of Contego Ecodermal Skin Spray

Companion

ECODERMAL SKIN SPRAY

Contego is the result of many years research and development to produce a 'skin safe' cleanser. It contains a proprietary hypochlorous solution which enables it to provide effective cleansing at a fraction of the strength of traditional cleansing chemistries.

Hypochlorous is a weak acid that also naturally occurs in the body to fight harmful micro-organisms. The hypochlorous has a unique oxidising method of action which cleanses and provides antimicrobial protection, but is also gentle on the skin: it doesn't harm, irritate or sensitise the dermal layer.

Benefits of Hypochlorous Acid:

- Non-toxic and safe
- Quick action
- Broad spectrum of activity:
 - bactericidal
 - fungicidal
 - virucidal
 - sporicidal
 - anti-biofilm
- Non-irritant
- Non-sensitising
- 100% natural
- Environmentally friendly

Available as a 250ml Spray and a 5L tub
