

RECOMMENDATION

- ▶ Adverse food reactions (food allergy and/or food intolerance) resulting in dermatological and/or gastrointestinal disorders
- ▶ Gastrointestinal problems such as diarrhoea, vomiting and flatulence caused by malabsorption, maldigestion, EPI, acute gastroenteritis or IBD
- ▶ Healthy dogs of all breeds and ages

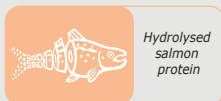

300 g

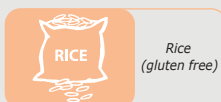

SPECIFIC™ CT-HY HYPOALLERGENIC TREATS

PROPERTIES AND RATIONALE FOR THE COMPOSITION

Hydrolysed salmon protein with a molecular weight <math><10.000</math> Dalton has a high digestibility and a low allergenicity.

Rice has a **low allergenicity and a high digestibility**, which makes it a perfect ingredient for hypoallergenic treats. Rice does not contain gluten and will thus be tolerated by dogs with gluten allergy/intolerance.

Very high quality and highly digestible ingredients make the treats especially useful for dogs with small intestinal diarrhoea.

ADDITIONAL INFORMATION

- ▶ SPECIFIC™ CT-HY Hypoallergenic Treats are based on very few ingredients; all of these are also used in SPECIFIC™ CDD-HY Food Allergy Management and SPECIFIC™ CΩD-HY Allergy Management Plus. Thus, food allergic dogs which can be successfully maintained on SPECIFIC™ CDD-HY Food Allergy Management or SPECIFIC™ CΩD-HY Allergy Management Plus can without any doubt tolerate SPECIFIC™ CT-HY Hypoallergenic Treats.

NUTRIENT CONTENT

Nutrient	Contents per 100 g	Contents per MJ
Energy kJ	1683	
Protein g (crude)	18.7	11.1
Fat g (crude)	12.0	7.1
Carbohydrate g (NFE)	54.9	32.6
Fibre g (crude)	1.0	0.6
Calcium g	0.76	0.45
Phosphorus g	0.72	0.43
Sodium g	0.60	0.36
Omega-3 fatty acids g	0.03	0.02
Ratio n-3:n-6	1:41	1:41
Water g	8.0	

INGREDIENTS

Rice, hydrolysed salmon protein, rice protein, pork fat, minerals, vitamins and trace elements, powdered cellulose, sunflower oil. Antioxidants: EC approved additives: BHA, BHT. The treats contain no artificial colours or flavourings.

FEEDING GUIDE IN GRAMS PER DAY

Use SPECIFIC™ CT-HY Hypoallergenic Treats as supplementary food to treat or reward the dog. In order to prevent the dog from becoming overweight, it is recommended that the daily food ration is reduced corresponding to the amount of treats given.

In the tables below, it is indicated how much the feeding amount of some selected SPECIFIC™ diets should be reduced when giving 5 SPECIFIC™ CT-HY Hypoallergenic Treats.

Dogs with adverse food reactions 5 SPECIFIC™ CT-HY treats replace:	gram
SPECIFIC™ CDD Food Allergy Management	19
SPECIFIC™ CDD-HY Food Allergy Management	19
SPECIFIC™ CΩD-HY Allergy Management Plus	19

Dogs with gastrointestinal problems 5 SPECIFIC™ CT-HY treats replace:	gram
SPECIFIC™ CDD Food Allergy Management	19
SPECIFIC™ CDD-HY Food Allergy Management	19
SPECIFIC™ CID Digestive Support	19
SPECIFIC™ CΩD-HY Allergy Management Plus	19

Healthy dogs of all breeds and ages 5 SPECIFIC™ CT-HY treats replace:	gram
SPECIFIC™ CPD-S/M/XL Puppy	18/18/19
SPECIFIC™ CXD-S/M/XL Adult	19
