

## THE BEGINNER'S GUIDE TO SHAPE & BAKE TREATS!

You will need...

- PRO PLAN® Veterinary Diet canned food
- Rolling pin
- Non-stick greaseproof paper and a baking tray
- Biscuit cutters
- A hungry dog!

1. Pre-heat the oven to 180-200°C. Open a tin of wet food and spoon some out.

2. Draw the food together with your fingertips to soften, shape into a ball, and either press the food down to flatten with your hands or use a rolling pin.

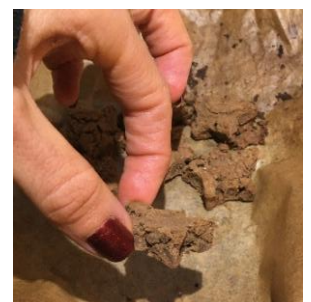

3. Cut shapes out of the food with a biscuit cutter.

4. Place onto greaseproof paper in a baking tray and bake for approximately 45 mins, turning halfway through. They should gradually harden to become crunchy.

5. Remove from the oven, allow to cool and taste test in any dog or cat wanting to volunteer for this role!

*Treats should form < 10% of daily energy intake and be included within the total daily feeding guideline. Baking may change the nutritional profile of the product.*
